

AE 2100A

Line & Base Maintenance

Course syllabus

Training level ATA 104 Level III

Target population Recommended for personnel performing line maintenance tasks.

General description This course provides description and operation information, systems knowledge, hardware knowledge, discusses basic troubleshooting/fault detection and fault resolution, line maintenance support equipment and applicable inspection, including a demonstration of fiberoptic/borescope inspection. The knowledge provided in this course is intended to supplement the information available to the line mechanic from the applicable technical manuals. Training consists of lecture and 'hands-on'. Lab times vary depending on need.
