

PRIDE

"Pride is when visions become reality and meet the highest standards."

Rolls-Royce Deutschland brings together a team of approx. 2,400 employees from more than 30 nations, pursuing their passion for excellence when it comes to designing, manufacturing and servicing state-of-the-art aerospace engines.

Our headquarters in Dahlewitz near Berlin are home to the company's Development, Assembly and Customer Service units as well as central administrative and strategic departments. It is here that we require the committed contribution of a high-calibre

Development Engineer Testing

Responsibilities

Test Preparation:

- Compile schedules for engine testing in line with customer requirements and certification specifications
- Organise and chair meetings for the purpose of coordinating tests with requesting parties and relevant technical departments
- Define test requirements
- Develop test programme, including schedule and budget planning
- Compile documents for engine and/or component approval and flight clearance
- Assist with engine assembly

Testing and Disassembly:

- Coordinate and manage engine testing
- Implement and coordinate changes to test, test equipment and instrumentation specifications
- Analyse tests and compile documentation during and after testing

Requirements

- Degree in engineering, with an emphasis on aerospace technology or mechanical engineering, or similar qualifications
- Basic knowledge of measurement technology
- Good technical understanding of turbo engines
- Track record in project management would be an advantage
- Hands-on experience in MS Office and MS Project, preferably complemented by knowledge of databases and SAP PS
- Excellent command of English, both written and spoken
- Well-developed communication skills and team spirit
