

PRIDE

"Pride is when the next generation emerges as a new pacesetter."

Rolls-Royce Deutschland brings together a team of approx. 2,500 employees from more than 30 nations, pursuing their passion for excellence when it comes to designing, manufacturing and servicing state-of-the-art aerospace engines.

Our operational unit in Oberursel near Frankfurt am Main/Germany is responsible for Components Manufacturing, Overhaul and Maintenance. We require a high-calibre individual to join us as

Service Support Specialist Tornado Secondary Power System

Responsibilities

- Coordinate and implement programmes aimed at increasing running times
- Develop or revise concepts for equipment maintenance
- Supervise and perform assessments of technical issues related to execution and initiation of appropriate measures
- Manage and carry out damage investigations
- Conduct reliability analyses
- Coordinate and implement studies into product optimisation and introduction/qualification of modifications
- Prepare and publish service/customer support information
- Evaluate and compile/review documentation content and specifications

Requirements

- Degree in engineering (technical university/university of applied sciences), with an emphasis on mechanical engineering or aerospace technology, or comparable qualifications
- Knowledge of turbomachinery and aeroengines
- Confidence in using standard software applications
- Excellent command of German and English, both written and spoken
- Team spirit, flexibility and ability to perform under pressure
