

Trent 900

Borescope Inspection

Course syllabus

Training level: ATA 104 Level IV

Target population: Personnel who specialise in borescope inspection damage assessment

General description: Provides identification of the borescope access ports, practical training with all the necessary equipment to make the inspection on each engine type, identifies and locates all the relevant information on engine damage limits, in the aircraft or engine maintenance manuals, and reviews their impact. The course also identifies and explains the requirements of all scheduled, non-scheduled or special inspections applicable.

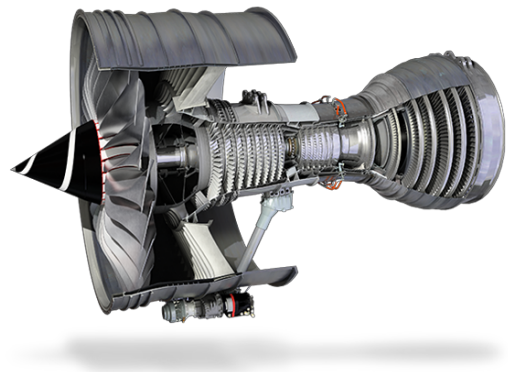

Notes: Students should be engineers, mechanics or personnel involved in borescope inspection and assessment.

Course schedule

Location: Derby Training Centre
